Drag and Drop 1

Drag drop the descriptions from the left on to the correct configuration-management technologies on the right.

The interface shows a list of six descriptions on the left and three technology categories on the right:

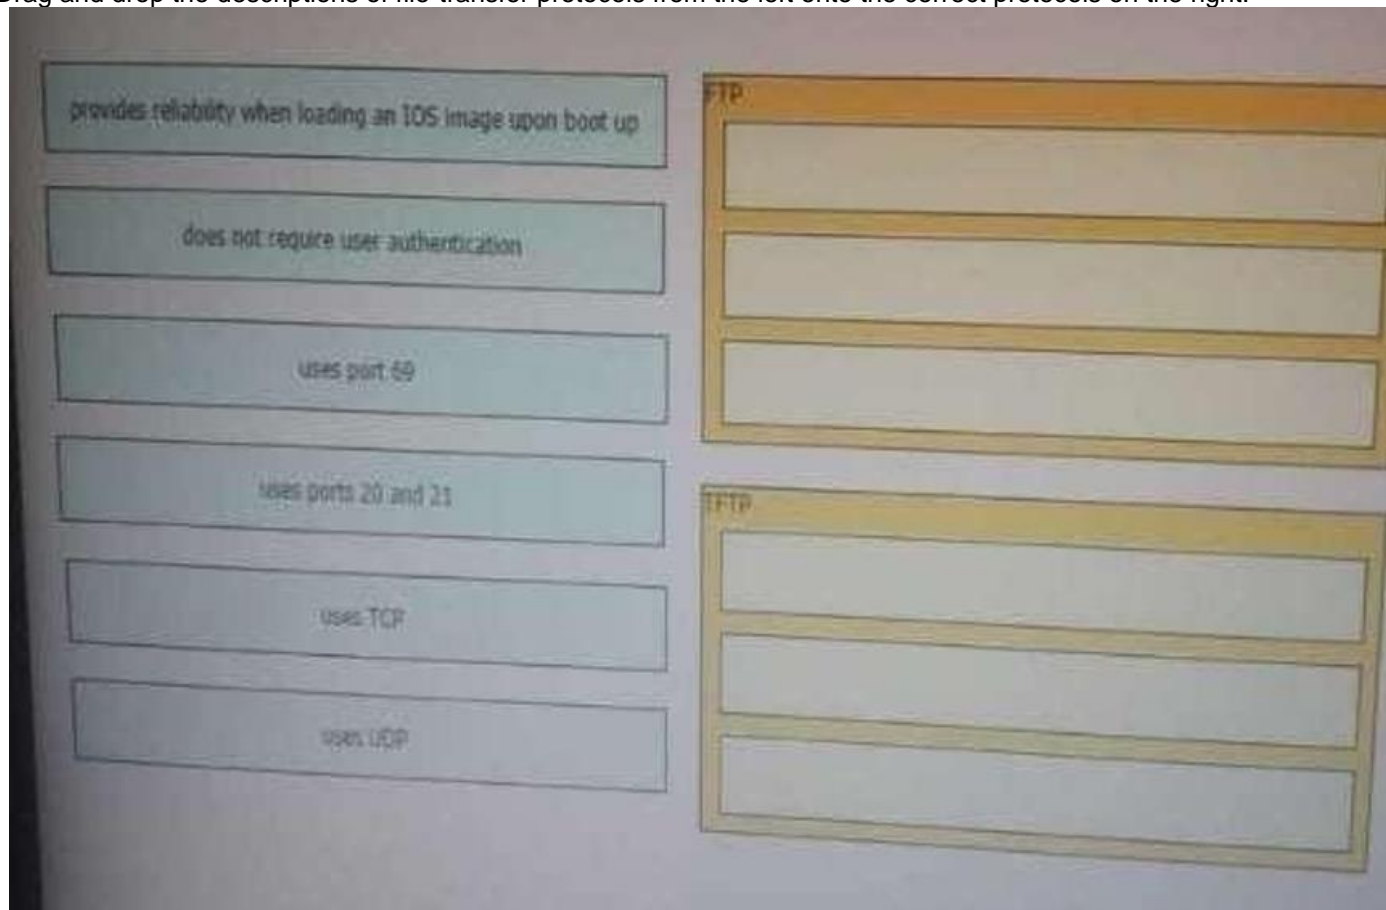

- Descriptions (Left):**
 - fundamental configuration elements are stored in a manifest
 - uses TCP port 10002 for configuration push jobs
 - uses Ruby for fundamental configuration elements
 - uses SSH for remote device communication
 - uses TCP 8140 for communication
 - uses YAML for fundamental configuration elements
- Technologies (Right):**
 - Ansible:** Two empty slots.
 - Chef:** Two empty slots.
 - Puppet:** Two empty slots.

Answer:

Drag and Drop 2

Drag and drop the descriptions of file-transfer protocols from the left onto the correct protocols on the right.

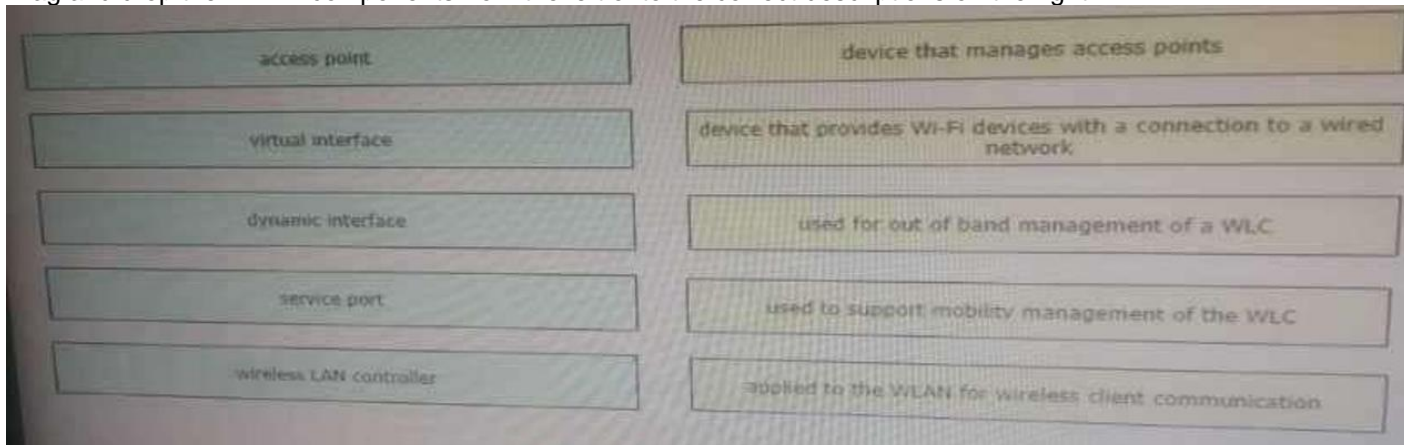

Answer:

Drag and Drop 3

Drag and drop the WLAN components from the left onto the correct descriptions on the right.

Answer:

Drag and Drop 4

Drag and drop the threat-mitigation techniques from the left onto the types of threat or attack they mitigate on the right.

Answer:

Drag and Drop 5

Drag and drop the functions from the left onto the correct network components on the right.

- holds the TCP/IP settings to be distributed to the clients
- resolves web URLs to IP addresses
- stores a list of IP addresses mapped to names
- assigns a default gateway to a client
- assigns IP addresses to enabled clients

DHCP Server

-
-
-

DNS Server

-

-
-

DHCP Server

- holds the TCP/IP settings to be distributed to the clients
- resolves web URLs to IP addresses
- assigns IP addresses to enabled clients

DNS Server

- stores a list of IP addresses mapped to names
- assigns a default gateway to a client

Drag and Drop 6

Drag and drop the AAA functions from the left onto the correct AAA services on the right.

records user activities
restricts the services that are available to a user

identifies the user
controls the actions that a user can perform

provides analytical information for the network administrator
verifies the password associated with a user

Authentication

Authorization

Accounting

Answer:

Authentication
identifies the user
controls the actions that a user can perform

Authorization
records user activities
restricts the services that are available to a user

Accounting
provides analytical information for the network administrator
verifies the password associated with a user

Drag and Drop 7

Drag and drop the benefits of a cisco wireless Lan controller from the left onto the correct examples on the right.

dynamic RF feature	Access points automatically adjust their signal strength.
easy deployment process	The controller image is deployed automatically to access points
easy upgrade process	The controller provides centralized management of users and VLANs.
optimized user performance	The controller uses load balancing to maximize throughput.

Answer:

	dynamic RF feature
	easy upgrade process
	easy deployment process
	optimized user performance

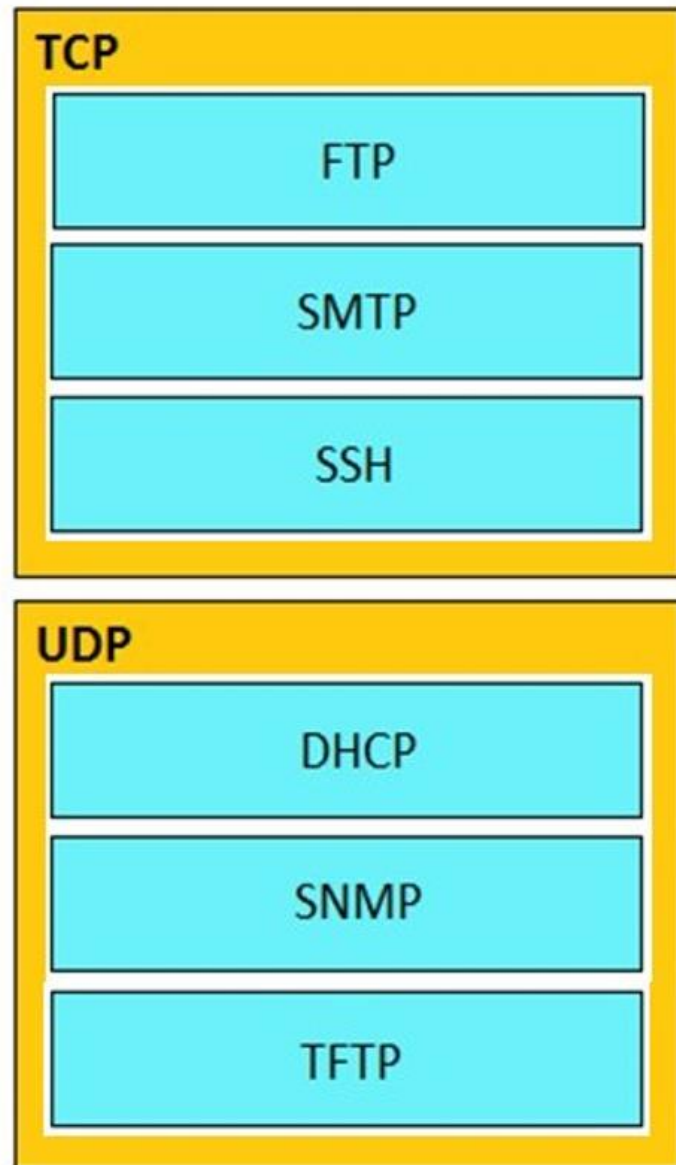

Drag and Drop 8

Drag and drop the application protocols from the left onto the transport protocols that is uses on the right.

DHCP
FTP
SMTP
SSH
SNMP
TFTP

TCP
UDP
